

New Articles

Posted by Kim - 23 Feb 2011 23:49

Ok I have managed to upload 4 new articles

New CV from DocSarah - She does a lot more for us than you could ever realise

Next a reply to a Forum post about Stem Cell Therapy - her answer says it all is still just in the Forum.
Will move to Article - Test - until I am happy

Prognosis seemed important

Finally, an email I received on a link sent to me about a treatment being offered in Canada:woohoo:

I have also got a new photograph (of the Doc) and strap lines to post but need Jamie's help with that
because it is technical:huh:

Also think I am going to change my sign in name as this password is too hard but not if I can't take
Nemesis with me.

Have signed on to Twitter but please I couldn't cope with Facebook:(

Kim
