

We were expired.....!

Posted by Kim - 25 Nov 2011 20:39

Hi Folks:

We were expired by our host server as I had the wrong password .
My fault because when we were last hacked, Jamie encrypted brand new passwords and the one I use to check the website was not the the same one to deal with the account. So I take full responsibility for the down time. Jamie has done me a backup system should the server fail again so my 10,000+ lines are safe.

Meanwhile, despite her health failing, DocSarah has sent me some interesting links you might want to check out.

Docsarah is also on facebook and twitter - please I can't get there unless a grandchild visits!!!! 

Apologies again

Kim

We were only down for 5 Days until I figured out the new encrypted password!

BTW check out the new article you prompted to be updated on the front page
