

## PRIVATE HEALTH CARE TREATMENT

Posted by helen - 02 Feb 2006 12:22

---

Did you know that private health care insurance does NOT APPROVE or PAY for steroid epidural treatment. According to their rules any drugs used outside the terms of their license are prohibited! I tried very hard to get the GMC to investigate my negligent doctor because he openly admitted defrauding them for many years. My insurance company, after their own investigation, also asked the GMC to look into the situation - but not surprisingly - they refused 🙄

Has anyone else had a similar experience?

Take care, Helen
