

"BUZZING SENSATION"

Posted by helen - 04 Jul 2007 23:48

Has anyone experienced a buzzing sensation which seems to come from your central core?

I've read that some people get "crawling insect" sensation on their skin - but this is different.

All theories welcome 😊

Hi Helen

Yes have heard of this and will go off tomorrow to check where from. Had Jamie tonight updating the Forum so am completely wiped out.

Will populate the Forum and website tomorrow - she said

Kim

😊

Hi Kim

Hope everyone is doing well at this time - the Forum seems quiet, perhaps it's the holiday season! Just wanted to nudge your memory - any info on the buzzing sensation?

Best wishes H
