

Dual Diagnosis

Posted by shorthandedgoal9 - 07 May 2009 18:40

Anyone out there with a dual diagnosis of both AA and MS ?

My wife has been diagnosed with AA since 1978(Drs. Burton and Ray at Sr. Kenney Inst.) and MS by Dartmouth in 1986 and march of this year. I pray no one else has this nightmare but would appreciate any and all comments .

Oh Dear

I am so sorry that this is still going on. This was quite commom in the '80's and early '90's when there was litigation regarding Myodil. People were re-diagnosed with MS and when the litigation ended were then re-rediagnosed. It was a very distressing time for them. It is to do with the demyelanation and I know DocSarah has written up about it. Will go off and find a link on the website for you. The treatments appear to be the same for both conditions (apart from Interferon).

Will try by tomorrow

Bye for now

Kim
